4 **Label:** If  $v_{max} \geq v_{tmax}$  and the craft passes the test at 100%  $v_{tmax}$ : 9 [Yes / NA ?]

"THIS CRAFT HAS ONLY BEEN MANOEUVRE-TESTED FOR SPEEDS UP TO XX knots (YY km/h). SUDDEN, SHARP TURNS ABOVE XX knots (YY km/h) MAY CAUSE LOSS OF BOAT CONTROL, WHICH COULD RESULT IN SERIOUS INJURY OR DEATH. REDUCE SPEED BEFORE ATTEMPTING A SUDDEN SHARP TURN. READ OWNER'S MANUAL FOR ADDITIONAL INFORMATION."

General warning sign  
ISO 7010 — W001

**Affixed:** On the craft, in a legible number, in a location visible to the operator from the helm position(s).

#### Instructions/Warnings to be included in the owner's manual

|   |                                                                                                                                                                  |    |          |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|----------|
| 5 | Maximum manoeuvring speed in knots or km/h.                                                                                                                      | 10 |          |
| 6 | Required warning labels (see subject 3-4).                                                                                                                       | 10 | [Yes ? ] |
| 7 | Maximum recommended engine power                                                                                                                                 | 10 | [kW]     |
| 8 | <b>WARNING</b> - Not to install engine(s) with higher power output than recommended by the manufacturer. It can cause loss of craft control and injury or death. | 10 | [Yes ? ] |
